

ATLAS

Brand Guide

Brand Overview

An insight to what the Atlas is.

BRAND STATEMENT

Atlas is an data startup that aims to provides a comprehensive analytics framework designed to parse, process and interpret the Bitcoin and Ethereum data.

Atlas interprets the transaction ledgers using graph theory and machine learning to provide insights for exchanges, investors, regulators, and developers. They trace the path of transactions to detect and prevent risky behavior. Our solutions help our clients understand the cryptocurrency activity that is relevant to them, and give them the means to comply with anti money laundering regulation.

Atlas is a named after the greek god, Atlas, who was punished to carry to world, and it is often used to represent the world and maps. Similar to the god, Atlas would have the strength and stability to preserve the truth. Atlas originated from another startup, blockdynamics.

Mission

To be the stable, impartial provider of analysis on the complete state of the cryptocurrency network, similar to a world map.

Values

Transparent, Holistic, Novel, Truth, Insightful, Boundless, Potential

Logo

The logo is the face of our company and directs us in the way we move forward in the blockchain world.

LOGO

As Atlas is an B2B company, a stylised wordmark icon is used to convey the brands focus on data and node networks. The wordmark evokes a sense of discovery due to the space like font and the kerning. Two dots are used in the A to represent how we focus on node networks, and to highlight the direction we are going, which is up. In smaller sizes, the singular A can be used.

ATLAS

ATLAS

LOGO REQUIREMENTS

Exclusion Zone

Minimum Size

The logo should never be smaller than 85px in digital or 30mm in print.

The icon should never be smaller than 15px in digital or 5.5mm in print.

Logo Misuse

ATLAS

NO

Do not thicken the font

ATLAS

NO

Do not outline or create keyline around the logo

ATLAS

NO

Do not remove the dots or leave one out of the two

ATLAS

NO

Do not place the dots below the baseline

ATLAS

NO

Do not remove the sharp edges or change the dot.

ATLAS

NO

Do not use gradient fills on the letters or dots

ATLAS

NO

Do not reverse the colour scheme or use out of brand colours

ATLAS

NO

Do not distort or rotate the logo in anyway

Colour

Colour is what defines the brand's presence in the industry, and allows it stand out from the crowd.

COLOUR PALETTES

The main colours used for the brand should be largely monochromatic to establish Atlas' authoritative figure for blockchain data. The secondary colours can be used as accent colours, graphic elements or data representations. The blue is used to evoke a sense trust, and the purple discern important data connections that have been brought forth with our analysis.

RULES WITH COLOURS

Yes

Purple and blue can be used on both the white and back backgrounds. Whether it be for graphics, websites, the API, these colour combinations can be utilised. For typography, it should be white on black or vice versa, with highlight of blue if needed. A majority of the accent colour should be the blue, and purple used more sparingly.

Yes

The colour choice for the text on photos should be legible, hence on darker photos it will be predominately white. A opaque coloured background and be added behind the text to increase legibility, and blue should be used sparingly. Graphics can also be use, but generally the text would not interfere with the image, as with the example poster.

RULES WITH COLOURS

No

Using purple or blue colour backgrounds does not fit the brand aesthetic, and pairing them as text will only increase illegibility. While the body copy may be clear, the title is not. Graphics will also generally be on top of the white and black background, instead of the reverse. For photos, using full opacity colour blocks to place text is generally unadvised as it interferes with the photo, and using thin and non monochromatic colours for body copy is not advised as it is illegible.

Typography

Typography plays an important role in the way we communicate to our audience. The voice we portray must align with the brand image and values, and ensure that a level of trust and credibility is established for our users.

TYPEFACE

Proxima Nova

PRIMARY

The Proxima Nova will be Atlas's main typeface used throughout both print and web materials. It is easily legible, clear, geometric, and the extra kerning applied through the different weights will bring a sense of authority to readers. The font will be able to convey the brand's intention to be clear, transparent and credible. The font body copy should never be smaller than 9px, and the subtitles should always be in all caps to contrast with the strong headers.

TYPEFACE

Source Code Pro

DISPLAY

In the case where you would want to use fancier font for product names, large titles, or event badges, you can use Source Code Pro. Adhering the technology aspect of Atlas, this font is still a bold, legible but unique typeface to use. If used appropriately, it can be used to emphasise copy in an compelling way. No additional kerning is needed because of the code like kerning already embedded in the font.

Graphic Style

While for many B2B business, there is little need for a defined graphic style. However, as a data driven company, there is an importance on how we communicate this data. Hence, we have define a graphic style that truly brings out the brand image.

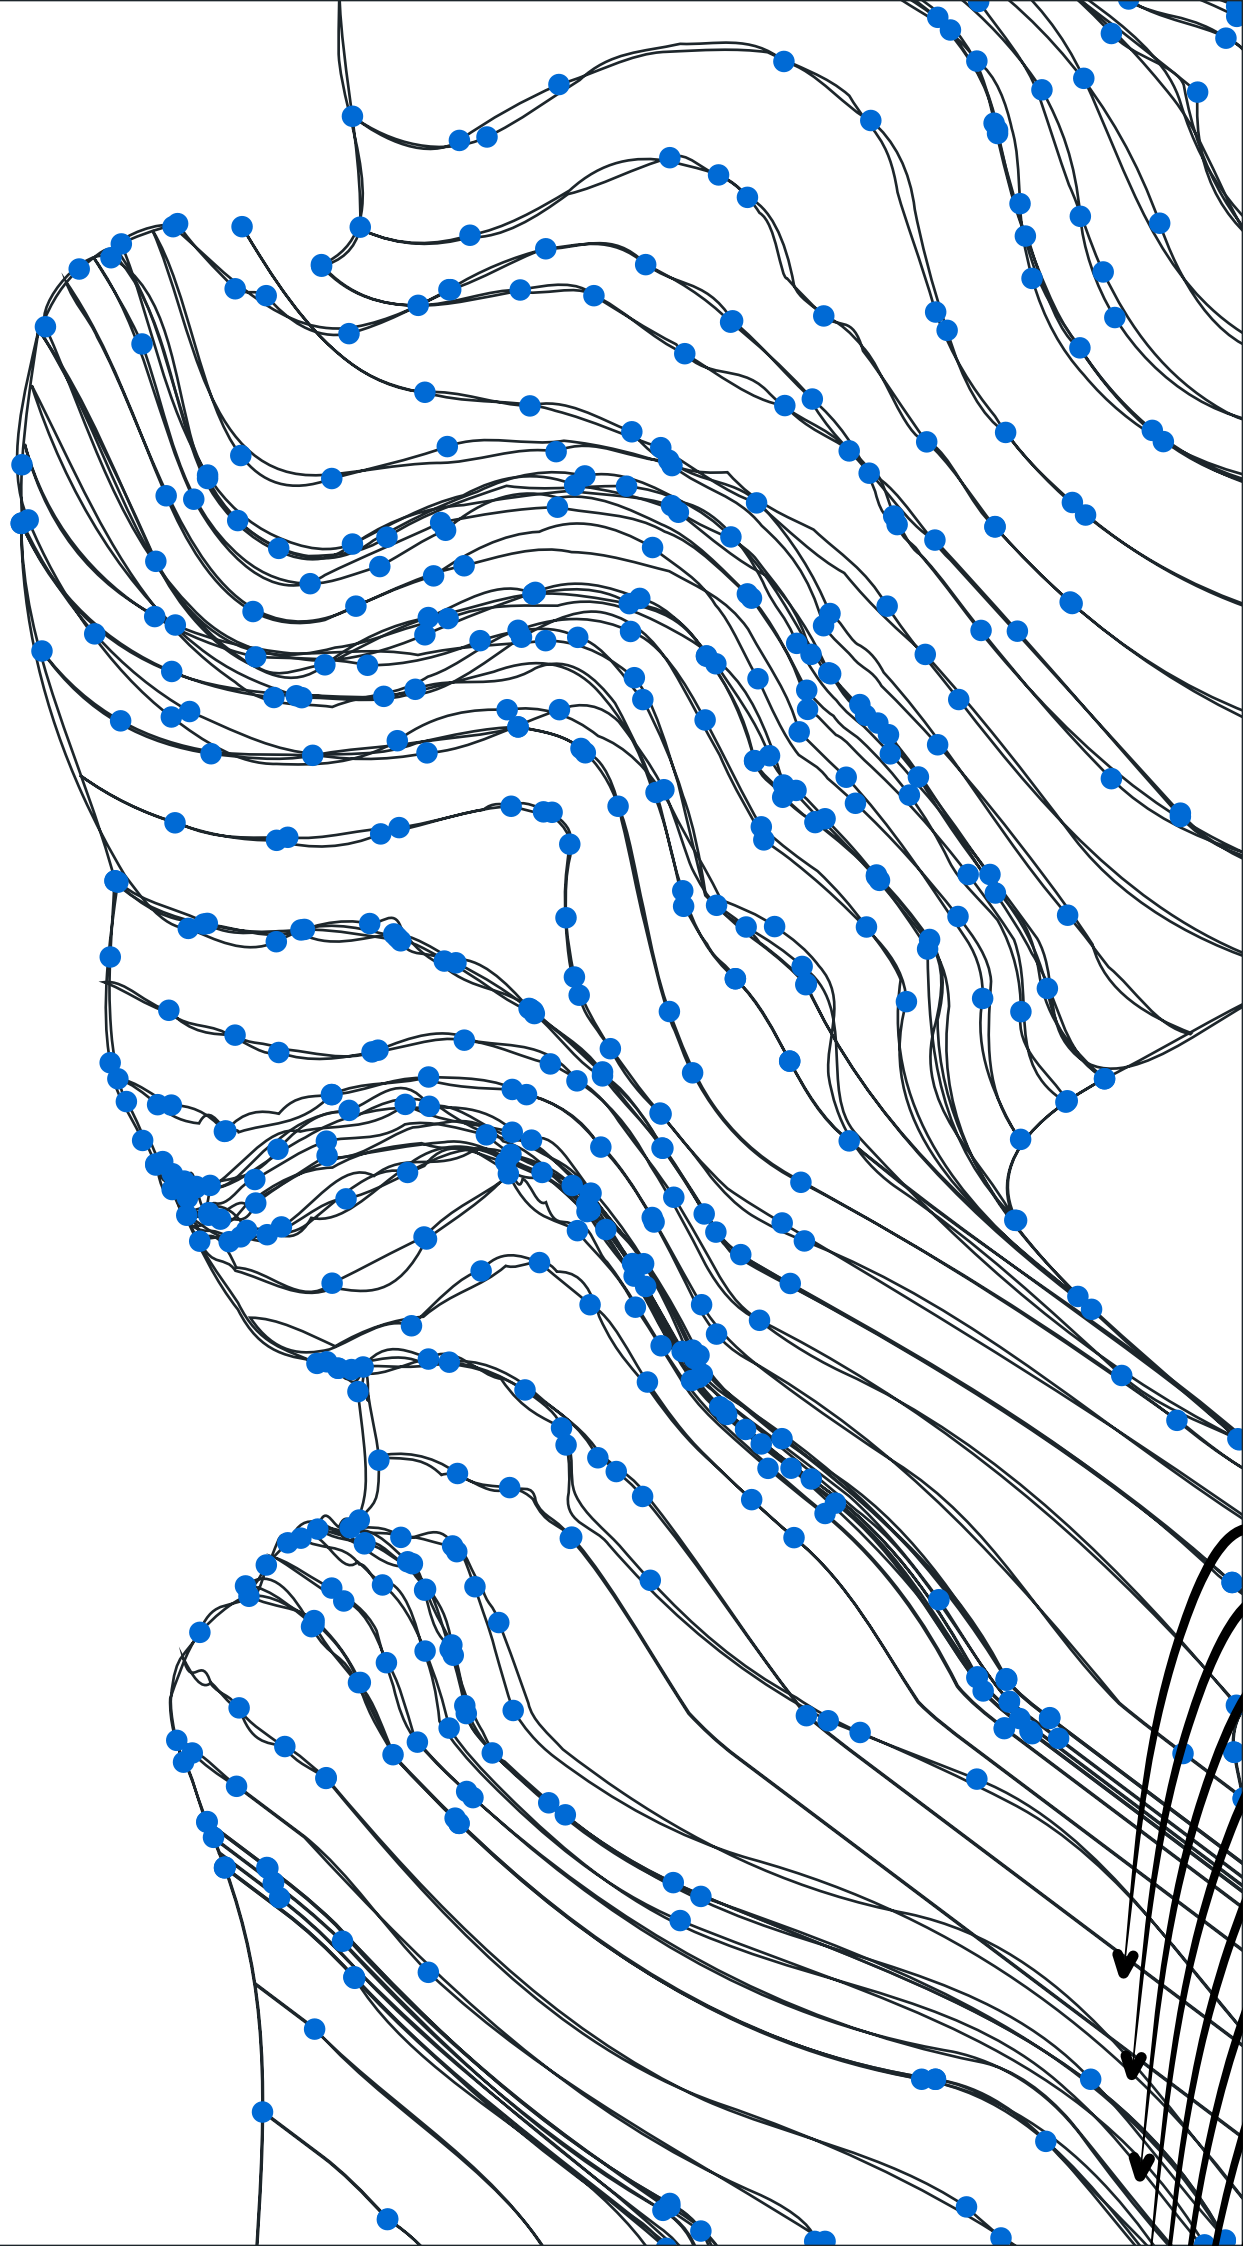

GRAPHICS

To elevate the brand image and have it stand out as a corporate company, many of the assets can be accompanied by digital graphics. The types of shapes that can be used draw inspiration from the logo: nodes, lines and arrows. These graphics would often depict of node networks, showing connections in various ways. One can experiment with different line manipulations using Illustrator tools, and also experiment with how the nodes are arranged. The main colour combination is also predominately monochromatic, but uses of red and blue can be used for nodes/lines.

The background of the slide is a dark teal color with numerous thin, wavy, and overlapping lines in shades of orange, yellow, and light teal. These lines create a sense of movement and depth, resembling light trails or abstract brushstrokes.

Photography & Layout

While not as important in comparison to the graphic, photography and layout help reinforce the brand image.

PHOTOGRAPHY

Photography can be used to elevate and reinforce the Atlas brand image. Generally, four types of photos are used: data, high exposure light traces, networks, and business meetings. These represent what Atlas does, and help maintain the professional, grand and technological aspect of the company. Photos can be used for graphic, posters, or to illustrate certain points. They are often edited with a moody quality to reflect the competency. The photos chosen here can be found online and have no license.

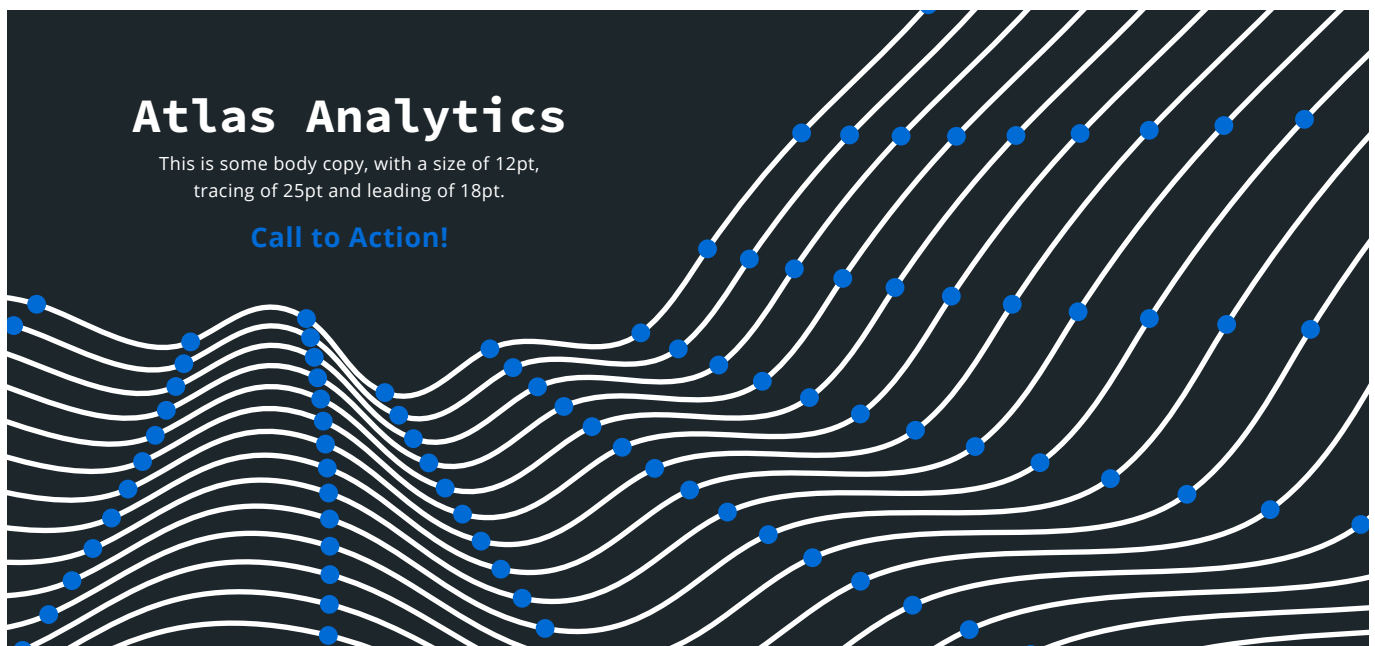

LAYOUT

In order to uphold the airy quality of the brand, there are certain layout guidelines that should be adhered to. Any copy that is created must have adequate and equal spacing between and around the text. This is to maintain legibility, allowing the copy to breathe and feel grand in comparison to the strong visual that it will be paired with.

Copy Design

	Atlas Analytics	
	This is some body copy, with a size of 12pt, tracing of 25pt and leading of 18pt.	
	Call to Action!	

Example

GRID LAYOUT

For web and print layouts, placing elements using the 12-grid layout allows for structure, alignment and symmetry. Alternatively, the 6 column grid can be used for smaller screen sizes or portrait posters.

12 Column Grid

960px grid, 60px column width, 20px gutter, 10px side margins
